

SAGE MAS 500

eORDER

BUSINESS INSIGHTS

Sage MAS 500 takes inquiry, drill-down, monitoring, and data analysis to a whole new level with out-of-the-box business intelligence tools, including Business Insights Analyzer, Business Insights Explorer, Alerts, Crystal Reports®, Web Reports, and integration with desktop productivity tools.

eOrder leverages the power of the Internet so your sales team can maximize selling opportunities, provide exceptional customer service, and ensure that your company keeps its competitive edge.

THE POWER OF eORDER

- Access critical account information online anytime.
- Expedite customer credit applications.
- Place orders online.
- Check status of orders and shipments.
- Track payment, billing, and credit information.
- Review sales goals and commissions.
- Streamline order entry by simultaneously viewing the order, item listings, item details, and even images.
- Increase productivity with rapid order entry features.
- Automate workflow by automatically sending e-mail order acknowledgements to customers.

Empower Your Sales Force

The Sage MAS 500 ERP eOrder module will empower your salespeople with a level of efficiency, productivity, and customer service that is sure to boost sales. With eOrder, you can keep your sales team in the field and help them maximize their selling opportunities. eOrder empowers your salespeople with real-time remote access to critical customer account information and the ability to perform essential sales activities, including placing orders, checking order and shipment status, as well as managing invoicing, payment, and credit history.

Downtime turns into uptime when your sales team has remote access to their accounts. Whether you're on the road, in flight, or at home, eOrder can keep you connected with new opportunities, forecasts, and the latest sales and commission results.

eOrder also provides streamlined order entry for inside sales staff. This powerful order entry screen allows employees to view item catalogs, details, descriptions, and even photos, as they enter orders—speeding the order entry process. Intuitive tree navigation and quick entry features also can maximize productivity. Moreover, eOrder takes advantage of many powerful Sage MAS 500 order entry features, such as product and customer-specific pricing.
